

Sandwich Bag

Science

Science is not a spectator sport! For students to truly understand the concepts that make our world operate, they must be able to do experiments. Unfortunately science supplies can get quite expensive and in many cases, they're not at all that "kid friendly." Join us at this workshop where we will be doing some "hands-on" science experiments using inexpensive, easy-to-find household materials, such as Ziploc sandwich bags!! I hope that your child will be inspired to learn about science and that it gives you the inspiration to develop your own inexpensive, fun science activities!

To Register: Go to the home page: www.odysseyk12.org and pull down the menu "Orientation" and click "Parents As Teachers Workshops."

Any questions: Call Diane Kelly at 257-0578 Ext. #6523
